

# Ivan Bratanov 12228892 WS24

## Netzwerk:

### Kurzbeschreibung:

- My old network class as well as the helper classes from the same package

### Quellen

- My project from SS24

## Benutzeroberfläche & MVC:

### Kurzbeschreibung:

- Parts of the Model and View are taken from my old project with minor changes and improvements. The structure of the model and view is completely different. The structure of the MVC itself is also completely different and based on my own understanding of the concept from the lecture.

### Quellen

- My project from SS24

## Kartengenerierung:

### Kurzbeschreibung:

- Almost the whole map generation was taken from my SS24 project with almost no changes.

### Quellen

- My project from SS24

## Wegfindung:

- Nothing

## Datenstrukturen:

### Kurzbeschreibung:

- Coordinates, MapNode, GameMap, and other model classes are taken from my old project

### Quellen

- My project from SS24

## Business Logik (Logik/Algorithmen die nicht zu den vorherigen Themen passen):

- Nothing

## Qualitätsfaktoren - Fehlerbehandlung:

### Kurzbeschreibung:

- The way I am logging errors and throwing exceptions is similar to the way I did it last semester

### Quellen

- My project from SS24

## Qualitätsfaktoren - Testing:

### Kurzbeschreibung:

- A lot of the information I got about writing tests was from tutorials and chatGPT. On occasion I have used chatGPT to help me debug a problem, and have pasted in it's solution, whenever it was valid.

### Quellen

- chatGPT 4o prompts such as: "What is a negativity test? Give an example" or "How is Mockito used? What for?" or "Can a mock actually store data in itself?"
- chatGPT 4o for debugging with prompts such as "Why could the following code be throwing a

NullPointerException?"

## Sonstige Quellen (welche nicht zu den vorherigen Punkten eingeordnet werden können)

### Kurzbeschreibung:

- ChatGPT for help debugging problems such as NullPointerExceptions or unexpected behavior was used throughout most of the project but especially for the tests.
